

Ordering a Flu Vaccine

There has been some confusion around the flu codes that need to be ordered. Previously on the SuperBill there were two codes:

- 90688 – Flulaval Adult Non Medicare
- Q2036 – Flulaval Adult Medicare

We have programmed the software to eliminate the need for clinical staff to have to choose between the two flu vaccine codes. **All adult flu vaccines should be ordered as 90688.** If the patient is a Medicare patient, the system will automatically recognize this and insert the Q2036 code when the billing team submits the claim to Medicare.
